TÜVRheinland® test durability test and evaluation of the resilience characteristics according to LGA-Guidlines and DIN EN 1957: 08.2000

Test report No. 21148850-16 of the mattress «Diamant»

A roll with a force of 1400 N goes back and forth to simulate a sleeper on the mattress. Measurements are taken once at 30,000 cycles and a second time at 60,000 cycles. 30,000 cycles = 8 to 10 years of use.

The test is based on 100 points maximum, that are divided into 4 poles; height difference; firmness difference for each stage and loss of resilience.

50 points: performance minimal value

> 70 points: good quality

> 80 points: excellent quality
